Privacy Policy for EroLabAI

Effective Date: October 17, 2025
EroLabAI owner:
iosexpander@gmail.com
Lead Developer:
borisbeliaev0@gmail.com

1. Introduction

EroLabAI (the App) respects your privacy. This Privacy Policy outlines what data is collected, how it is used, and what your rights are.

2. Data Collection

The app **does not collect or store personal data** on any external servers.

- The app detects first-time usage to enable limited free access. This information is stored locally on your device and is not shared or transmitted.
- The app does not request or access any user-identifiable information, such as name, email, contacts, or location.
- Users can optionally **save generated responses** to local storage (favorites), but this data remains on the device and is never uploaded.

3. AI Prompt Handling

- The app uses **OpenAI's API** to generate responses to user prompts.
- All AI-related queries are routed through a **proxy server** located in **Frankfurt, Germany**.
- The only data sent to the AI service is the **user's input prompt**, which may contain personal content if the user chooses to include it.
- Prompts are not stored or logged on the server. The server is used **only to forward requests** and securely hold the API key.

4. In-App Purchases

The app uses **StoreKit** to handle all in-app subscriptions and purchases. Payment information is processed securely by Apple. The app does not access or store payment details.

5. Analytics and Crash Reporting

The app uses **Firebase Crashlytics** and **Firebase Analytics** to collect anonymous crash reports.
Analytics helps understand which features are used most often, so the app experience can be improved. No personally identifiable data is sent.

6. Age Restrictions

This app is intended for users aged **17 and older**. Some content categories (e.g., 'Love Letter') may involve topics related to relationships or adult themes based on the user's input.

7. Your Rights

Since no user data is collected or stored by the app or its backend, there is no data to request, access, or delete.
